

6th US/China Science and Technology Workshop

Time: June 16th-25th, 2021 Location: A601, NAOC

Program Details

- **Session 1-4:**
 - June 16, 2021 7:30 am - 10 am BJT;
 - June 18, 2021 7:30 am - 10 am BJT;
 - June 22, 2021 7:30 am - 10 am BJT;
 - June 24, 2021 7:30 am - 10 am BJT;
- **Potential Discussion Session:**
 - June 25, 2021 7:30 am - 10 am BJT.

The National Radio Astronomy Observatory and the Shanghai Astronomical Observatory are pleased to host the 6th US-China Radio Astronomy Science and Technology Workshop. This is the latest in the series of workshops designed to promote collaboration in radio astronomy between Chinese and US scientists.

Radio astronomers in both the US and China are involved in a number of exciting research programs and have ambitious plans for future new instruments. The Workshop will consist primarily of invited talks covering a broad spectrum of research and planned instrumentation in both countries. Planned talks will cover the status of FAST, QTT, ngVLA, SKA, VLBA, GBT, Arecibo, VLA, ALMA, and DSA-2000 as well as existing and planned research programs using these facilities. Participation in the workshop is open to all. There is no fee to attend, but we ask that participants to register.

All sessions will take place as Zoom meetings. Links will be sent to all registrants prior to the start of the session.
